Projects

Portfolio |  Github |  Live Link

- My personal portfolio website which give my all skills related information
- Make with the help of **HTML, CSS, TAILWIND CSS, JAVASCRIPT**.
- Also implemented dark mode.

Blog App |  Github |  Live Link

- Blog app is a Full-stack **MERN** web app project where users can register, and log in to write a blog.
- Users also can post images with the blog and perform all the **CURD** operations with their blog only.
- for the backend, I used **Node.js**, for the database **MongoDB** and hosted it on **Heroku**.

Movie App |  Github |  Live Link

- Movie App is a web app that provides information like genre, year, IMDb rating, etc. about different movies.
- It has a **search** functionality where users can search movies and get information.
- Movie App is a single-page application that is created in **React.js**, and fetches data from **OMDb API**.
